Full Service DAMAS Compliant Lab

Servicing The Whole of UK

A Little About Us

Established in 1977 and digital since 2002, we started as a crown & bridge lab for local dentists and have grown to become an established part of the UK dental scene while remaining a family-run company. We have been working with the UK's largest dental groups for many years and are currently trusted with in excess of **65,000 patient smiles a year**.
